

**TOGETHER WE MAKE
THE DIFFERENCE**

Capabilities

The EPSI Team is dedicated to improving manufacturing operations around the world. We specialize in designing solutions that improve yield, throughput, safety, and increase life cycles. Our expertise lies in creating non-conductive protective coatings, masking, racking and custom tooling and design. We strive to make manufacturing processes more efficient by reducing the wear and tear on personnel and equipment.

EPSI serves globally, with manufacturing sites in Germany, Texas, Michigan, Tennessee and Wisconsin, and distribution sites in Germany, China, Mexico, the United States and Canada.

Our commitment to logistics, turn times, and reliability make us the trusted choice for some of the top Fortune 500 companies. When it comes to custom tooling, we are the experts.

Design & Engineering Services

Our custom engineering services are a cut above the rest. Our team has over a decade of combined experience and expert knowledge of all types of masking and racking. They're dedicated to designing masking and racking that will optimize your equipment's capabilities, with a focus on loading and unloading efficiency, as well as minimizing potential ergonomic complications. Whatever your challenge may be, we'll hit our Proven Process and deliver unique solutions that exceed your expectations.

Custom Metal & Plastic Fabrication

When evaluating processes and determining solutions, we can help you save money on custom fabrication. In today's metal and plastic finishing industry, it's important to find the most efficient and cost-effective procedures, and we guarantee to provide valuable options. Whether it's a new design or a custom rebuild/repair, our knowledge-based services ensure that you receive the best possible solutions for your operation. With EPSI's expertise in evaluating and implementing fabrication solutions, you can be confident that your customers will receive the high-quality outcome they demand.

Rebuilds/Repairs

This is where you save. If you have a rack that needs modifications or repairs, our team can help you refurbish re-engineer to meet your needs. We specialize in updating existing racks to ensure they are in top shape and ready to use. Our audit process will suggest the best modifications to your invested hanging concept, so you can get the most out of the rack you already own.

Burn-Off Services

Company History

- » A company in the Amtraco Family of Companies
- » Founded in 1976 Franksville, WI by Kissak Sarajian
- » Family owned and operated Since 1976
- » Started as a masking company primarily for the surface finishing industry
- » Expanded into hook manufacturing in 2010
- » Expanded into custom racking/tooling in 2019
- » Over 175 team members
- » Locations in the United States, Canada, Mexico, China and Germany

Your Advantages with EPSI:

Opportunity Assessment

Gather client data to identify and support client needs. Establish a working partnership. Present EPSI's capabilities.

Plan Development

Analyze project requirements. Create effective solutions. Gather data to support.

Design

Engineer product design using 3D modeling software to review with client prior to build.

Fabricate

Execute a flawlessly built product that exceeds our customers expectations.

Quality Control

Strict adherence to SOP and QMS processes. ISO 9001 certified.

Continued Partnership

Foster continued client relationship to identify future partnerships to streamline and maximize client return.

SC

Silicone Caps

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » When sizing parts as a cap, the ID of the cap should be 2-5% smaller than the stud diameter
- » To ensure easy removal, select a cap length that is slightly longer than the masking length of the stud. This is especially important if the cap ID is less than 5% of the stud diameter
- » When sizing parts as a plug, the OD should be at least 7% larger than the hole diameter
- » When using to cover tube ends in powder coating, cut a small slit in the top of the cap to prevent blow off (See EZY™ Caps)
- » Can be used as a cap and a plug
- » Flexible enough to conform to irregular geometry
- » Round top profile allows for easy insertion into holes
- » Silicone Caps are reusable and will not melt or harden
- » Color coded for increased visibility and easy sorting during reuse

EPDM Caps

Heat resistant up to 475°F (250°C)

Material: EPDM

Duro: 55 +/- 5 Shore

- » When sizing parts as a cap, the ID of the cap should be 2-5% smaller than the stud diameter
- » To ensure easy removal, select a cap length that is slightly longer than the masking length of the stud. This is especially important if the cap ID is less than 5% of the stud diameter
- » When sizing parts as a plug, the OD should be at least 7% larger than the hole diameter
- » When using to cover tube ends in powder coating, cut a small slit in the top of the cap to prevent blow off (See EZY™ Caps)
- » Can be used as a cap and a plug
- » Flexible enough to conform to irregular geometry
- » Round top profile allows for easy insertion into holes
- » EPDM caps are reusable and have excellent chemical resistance
- » Economical enough to be used one time in high temperature applications or where the cap will be used during shipping after coating process

VC

Vinyl Caps

Heat resistant up to 212°F (100°C)

Material: Vinyl

Duro: 55 +/- 5 Shore

- » economical alternative to Silicone and EPDM Caps
- » protects parts from debris and contamination during shipping
- » when sizing, ID of cap should be 5-7% smaller than OD of stud

W/C

Washer Caps

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » For other washer diameters, EPSI can die-cut a silicone foam donut shaped washer or donut tape die-cut to be used under the cap
- » SC-series caps can be nested inside the washer cap to create smaller ID's
- » Can be used as a cap and a plug
- » Washer creates area free from powder for assembly purposes
- » Flexible enough to conform to irregular geometry
- » Washer feature creates area free from powder for assembly purposes
- » When sizing as cap select an ID that is 2-3% smaller than the stud
- » When sizing as a plug select an OD that is 5-7% larger than the hole

CON

Cone & Cons Caps

- » Versatile enough to be used as caps, stoppers or plugs in any variety of applications
- » When sizing parts as a cap, the ID of the cap should be 2 - 5% smaller than the stud diameter
- » To ensure easy removal, select a cap length that is at least 1/4" longer than the masking length of the stud. This is especially important if the cap ID is less than 5% of the stud diameter
- » Conical profile allows for easy insertion as a plug
- » Washer feature creates area free from powder for assembly purposes
- » Will fit multiple diameter threads when used as a cap
- » Flexible enough to conform to irregular geometry and great for square holes
- » Silicone Cone Caps are reusable and will not melt or harden
- » When sizing parts as a plug, the MJD (major diameter) should be 2 - 5% larger than the ID of the hole you are plugging

FSC

Flat Silicone Caps

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Alternative to many Silicone Cap (SC) sizes
- » When sizing parts as a cap, the ID of the cap should be 2-5% smaller than the stud diameter
- » Reduces creepage in applications where temperature changes rapidly
- » Flexible enough to conform to irregular geometry
- » Flat top aids application and minimizes air trap
- » Flat Silicone Caps are reusable and will not melt or harden

MLC

Multi Length Caps

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Convenient: They reduce inventory and require less logistics due to one cap covering a multitude of stud and threaded stud lengths
- » Durable: Made of durable, high temperature resistant silicone for repeated use
- » Versatile: Each cap can replace between two and four standard silicone caps from the EPSI catalog
- » Innovative: Installation & removal of the caps are facilitated by a generous handle
- » When sizing as a cap, ID should be 5-7% smaller than stud

EZY

Easy Caps

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » If internal pressure is causing blow-offs, place a slit in or remove the nipple. This will allow for venting of internal pressure (Not recommended for immersion coatings)
- » Due to the internal ring, a much smaller ID can be used compared to a standard cap
- » Size at least 10% less than the stud OD
- » EZY™ Caps are ideal for large diameter or long length products
- » Specially designed internal ring allows for easy placement and a liquid-tight seal
- » Oversized head for easy removal
- » Many sizes available with built-in air-vent to eliminate the effects of pressure build-up
- » EZY™ Caps are reusable and will not melt or harden
- » EZY™ Caps offer fine line masking

MBM

Multi Balloon Masking

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 20 +/- 5 Shore

- » Features an incredible stretch rate – 150%! So many shapes and sizes can be masked with only one MBM
- » Five balloon masks replace 30+ standard silicone caps
- » The five balloon masks collectively stretch from 12.7 mm to 431.9 mm
- » Convenient: Easy to use – just slip it over a part
- » Durable: Made of thin, soft, high temperature resistant silicone
- » Innovative: During the hot curing process, the balloon masks will inflate before they pop off the part being masked
- » Perfect Fit: The bead molded into the bottom of each cap allows for a tighter fit around the part being masked
- » Fast & Easy: Very effective for relatively larger parts that aren't necessarily round
- » Undersize 10-15% to start
- » Roll it up for easier application and removal

Custom Masking

Are you spending too much on masking labor?
Is your line speed suffering due to complicated masking?
Do you want to reduce your 3P cost (per painted part)?
If so, custom masking from EPSI is for you!

EPSI is proud to offer custom silicone masks. Our in-house engineering team possesses over a decade of experience in partnering with clients towards the production of tens of thousands of custom silicone masks. We continually lead the industry in creating efficient, custom solutions that cater to diverse applications.

At EPSI, our custom silicone mask process commences by gathering all relevant data from the client, including drawings, samples, and any other pertinent information.

Through a comprehensive consultation process, we discuss and determine the most suitable masking method to utilize. Our ultimate goal is to produce a final product that aligns with the client's precise requirements and specifications.

We believe that our proficient workforce, coupled with our extensive experience, enables us to consistently deliver quality custom silicone masks to our esteemed customers.

Go Custom with EPSI and SAVE!

STS

Silicone Tapered Stoppers

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » For the best fit, match the hole diameter to the plug midpoint diameter
- » Silicone Tapered Stoppers are not recommended for exposure to aggressive chemicals or hydrocarbons
- » Tapered design to fit a variety of hole diameters
- » Compressible for better sealing of both threaded and non-threaded holes

CRKR

Cork Stoppers

Heat resistant up to 300°F (150°C)

Material: Cork

- » Cork Stoppers can be easily trimmed for shallow cavities
- » Select a stopper whose midpoint diameter is closest to the diameter of the hole you are plugging
- » Ideal for wet paint and low-temp powder coating applications
- » Useful when it is necessary to leave a plug in for shipping

BES

Black EPDM Stoppers

Heat resistant up to 475°F (250°C)

Material: EPDM

Duro: 55 +/- 5 Shore

- » For the best fit, match the hole diameter to the plug midpoint diameter
- » Black EPDM Stoppers are not recommended for prolonged exposure to intense heat
- » Tapered to fit a variety of hole diameters
- » Compressible for better sealing of both threaded and non-threaded holes
- » Ideal for sand blasting
- » Excellent chemical and hydrocarbon resistance

FLP

Flangless Plugs

- » Designed to be inserted with direct pressure. Not recommended to thread into place. Threading may cause damage to the plug and difficulty during removal
- » Handle for easy removal
- » Tapered ribs and hollow core allow for masking of multiple sizes of holes
- » Sharp rib profile offers excellent chamfer coverage
- » Rigid design allow plug to be pushed into place

BTM

Blind-Hole Thread Mask Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Shallow design is ideal for blind hole applications and female threads
- » Flange geometry is specially engineered to mask off lead-in chamfers of threads
- » When sizing, make sure diameter of mask is at least 5% greater than hole size
- » Removes cleanly after use with no shrinkage

SPP

Silicone Pull Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 50 +/- 5 Shore

- » When plugging a hole, make sure the major diameter of the plug is larger than the diameter of the hole being plugged by at least 4%
- » Not recommended for holes with a lead-in chamfer or a countersink that require protection from paint. For these applications, EPSI recommends the Flex-Tite Pull Plug (CPP), the High Tensile Strength Weld Nut Pull Plug (GWPP) or the Washer Plug (WP) lines

Heat resistant up to 475°F (245°C)

Material: EPDM

Duro: 50 +/- 5 Shore

- » When plugging a hole, make sure that the major diameter of the plug is larger than the diameter of the hole being plugged by at least 4%
- » Not recommended for holes with a lead-in chamfer or a countersink that requires protection from paint. For these applications, EPSI recommends the Flex-Tite Pull Plug (CPP), the High Tensile Strength Weld Nut Pull Plug (GWPP) or the Washer Plug (WP) lines
- » Chamfered neck and smaller pull-tab diameter aid insertion
- » When pulled through holes, large diameter compresses providing a tight seal
- » High temperature EPDM formulation is extremely chemical resistant and economical

MSPP

Multi Step Pull Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 50 +/- 5 Shore

- » Convenient: A single MSPP replaces three of the most popular pull plug sizes. The reduces inventory and requires less logistics because of its versatility
- » Durable: Made of durable, high temperature resistant silicone for repeated use
- » Versatile: Next larger diameter on the same plug can be used to achieve a tighter fit

EMT/SMT

Mousetail Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Can be stretched to provide a leak-proof seal
- » Ideal for plugging small or hard to reach holes
- » EMT provides greater resistance to chemicals and hydrocarbons

CPP

Flex-Tite Dual Countersink Pull Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Innovative: The best way to mask 82° / 90° / 100° countersink holes
- » Self-Sealing: Crucial point first contact design ensures a liquid tight seal
- » Fast and Easy: Pull tabs ensure easy application and removal
- » Durable: High-grade silicone takes repeated use at high temperatures

DWP

Double Washer Pull Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 50 +/- 5 Shore

- » When plugging a hole, make sure that the plug diameter is larger than the diameter of the hole being plugged by at least 5%
- » To insert plug, place long stem into hole. Pull through until flanges are securely positioned around your part. To remove plug, pull short stem in reverse direction
- » Masks entry and exit threads simultaneously
- » Designed for common metric threads
- » Provides positive seal
- » Don't see the size you need? Ask about custom sizing!

Silicone Masking Stoppers

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » Reusable, does not melt or harden
- » Easy combination of different sizes
- » Fits hole diameters from 25.0 mm to 120.0 mm
- » Prevents the plugs from “popping out” in the oven
- » Flexible spacing of plugs on the connecting plugs possible
- » Versatile use - can be used with or without TSS product

TIPS

Tube Insert Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » When plugging a hole, make sure that the major diameter of the plug is at least 10% larger than the diameter of the hole being plugged
- » Flat washer will cover only the tube end
- » U-Channel washer can extend over tube end
- » Well suited for liquid tight seal, and resistance to blow-out

Washer Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone

Duro: 55 +/- 5 Shore

- » When plugging a hole, make sure the major diameter of the plug is 2-4% larger than the diameter of the hole
- » Twisting the plug as it is inserted will aid in installation
- » Silicone plugs are not recommended for exposure to aggressive chemicals or hydrocarbons
- » Tapered design for easy insertion
- » Washer masks grounding area around holes
- » One plug can be used to plug two different hole diameters
- » Second plug acts as a handle

TPSP

Port-Tite Plugs

Heat resistant up to 185°F (85°C)

Material: Polyethylene Plug with Integrated Flange and NBR O-Ring

- » Innovative: Effectively masks threads as well as protects during shipping/handling
- » Self-Sealing: Integrated flange and NBR O-ring provide liquid and air tight seal
- » Fast and Easy: Install/remove by hand, socket, wrench, or #2 phillips head screwdriver
- » Durable: High-density polyethylene stands up to repeated use
- » Ideal Solution: Flange and O-ring make Port-Tite perfect for plating applications

HTP

Hang-Tite Plugs

Heat resistant up to 600°F (315°C)

Material: Silicone + Metal

Duro: 55 +/- 5 Shore

- » Durable: Cold rolled steel insert and high temp commercial grade silicone to withstand repeated use
- » Versatile: Provides a liquid-tight seal in immersion processes, while allowing conductivity to your part
- » Convenient: Hangs heavier parts and seals off the first thread, or chamfer of the hole at the same time
- » Custom sizes available upon request

TCP

Tapered Cap & Plug

Heat resistant up to 185°F (85°C)

Material: Polyethylene

- » Versatile: Effectively masks as a cap or plug in a wide variety of applications
- » Protective: Keeps parts free from contaminants and debris during handling and storage
- » Fast and Easy: Quick to install and remove by hand
- » Economical: Inexpensive enough for one-time use, yet durable enough for repeated use

Current pricing and additional sizes available at www.epsi.com

Not all sizes are available in all warehouse locations - please check with your local sales rep for lead time and availability

NTS

Neoprene Tapered Stopper

Heat resistant up to 600°F (315°C)

Material: Neoprene

Duro: 55 +/- 5 Shore

- » For the best fit, match the hole diameter to the plug midpoint diameter
- » Silicone Tapered Stoppers are not recommended for exposure to aggressive chemicals or hydrocarbons
- » Tapered design to fit a variety of hole diameters
- » Compressible for better sealing of both threaded and non-threaded holes

Custom Masking

Are you spending too much on masking labor?
Is your line speed suffering due to complicated masking?
Do you want to reduce your 3P cost (per painted part)?
If so, custom masking from EPSI is for you!

EPSI is proud to offer custom silicone masks. Our in-house engineering team possesses over a decade of experience in partnering with clients towards the production of tens of thousands of custom silicone masks.

We continually lead the industry in creating efficient, custom solutions that cater to diverse applications.

At EPSI, our custom silicone mask process commences by gathering all relevant data from the client, including drawings, samples, and any other pertinent information.

Through a comprehensive consultation process, we discuss and determine the most suitable masking method to utilize. Our ultimate goal is to produce a final product that aligns with the client's precise requirements and specifications.

We believe that our proficient workforce, coupled with our extensive experience, enables us to consistently deliver quality custom silicone masks to our esteemed customers.

Go Custom with EPSI and SAVE!

A12

Green Poly Tape

Maximum Temperature	400°F
Tensile Strength	25 lbs/inch
Elongation	70 %
Peel Adhesion	23 oz/inch

» Total Thickness	3.2 mils
» Adhesive Thickness	1.2 mils
» Carrier Thickness	2.0 mils
» Adhesive Type	Silicone
» Carrier Type	Polyester
» Color	Green

400°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use.
Many factors can affect the use and performance of a product in a particular application.
This product should be tested to determine the suitability for its intended use.

FD12

Fiberglass (Glass Cloth) Dots

Maximum Temperature	500°F
Tensile Strength	170 lbs/inch
Elongation	8 %
Peel Adhesion	40 oz/inch
Dielectric Strength	3000 volts
Insulation Resistance	1500 meg ohms

- » Total Thickness 7.0 mils
- » Adhesive Thickness 2.0 mils
- » Carrier Thickness 5.0 mils
- » Adhesive Type Silicone
- » Carrier Type Glass Cloth
- » Color White

Custom Plotter

Are you spending too much on masking labor?
Is your line speed suffering due to complicated masking?
Do you want to reduce your 3P cost (per painted part)?
If so, custom plotters from EPSI are for you!

The EPSI Guarantee means we provide you with the best solution for your masking needs. Frequently, it's guaranteed in-stock products like our A12 green tape or our patented Wish-bone discs. But, occasionally only a custom shape will do and only EPSI can provide these custom pieces as quick and affordable as standard masking products.

Plotter cutting is a highly customized and economic process for quickly developing custom solutions for complicated masks and irregular shapes. Additionally, EPSI can place whole sets of plotter cut masks onto a single roll, reducing masking time and labor costs.

Through a comprehensive consultation process, we discuss and determine the most suitable masking method to utilize. Our ultimate goal is to produce a final product that aligns with the client's precise requirements and specifications.

Ask your local Sales Representative today about our custom Crepe, Green Ploy Tape, Orange Poly Tape or Kapton Tape plotters today.

Go Custom with EPSI and SAVE!

HV

V-Hooks

- » V-hook geometry allows for extreme stability while loaded (compare to other hook geometries)
- » Provides superior grounding due to multiple grounding contact points

0.250"	6.350 mm	DIAMETER CRS 1008 WIRE	60 LBS

HD=Hard Drawn CRS=Cold Rolled Steel

NOTE: The recommended safe load limits were compiled under static load conditions in a laboratory fully accredited by the American Association for Laboratory Accreditation, conforming to ISO Guide 25. Although all load limits incorporate a safety factor, many factors will affect the actual dynamic load capacity of a hook. Such factors include sudden change in line speed, vibration in the conveyor, or in the case of suspension from two hooks, a shift in the center of gravity caused by an incline or stretching along curves in the conveyor. This product should be tested to determine the suitability for its intended use.

* Please call your EPSI representative for further details.

CLAW

Claw Hooks

- » Designed to handle the most unusual of hanging situations
- » Their unique clamping action and strong contact points allow even the most unconventional of items to be hung
- » Three different sizes available:
 - Claw 200 – light loads up to 5 lbs
 - Claw 300 – medium loads up to 10 lbs
 - Claw 400 – heavy loads to 40 lbs

Part number	Length (in)	Wire Diameter (in)	Length (mm)	Wire Diameter (mm)	Prongs	Box Qty

HKSC

Sheet & Pipe Suspender Hook

- » Made of cold rolled steel
- » Reusable
- » Suitable for products that lack holes for suspension
- » Accept sheet metal up to 4.0 mm (0.160") thick
- » Has holes for use with standard hooks for easy hanging

Part number	Standard Thickness (in)	Metric Thickness (mm)	Box Qty
HKSC 002040	0.080	2.0	50

Custom Wire Forms

Are you spending too much on masking labor?
Is your line speed suffering due to complicated coating processes?
Do you want to reduce your 3P cost (per painted part)?
If so, custom wire forms from EPSI is for you!

EPSI is proud to offer custom hooks and hanging solutions. Our in-house engineering team possesses over a decade of experience in partnering with clients towards the production of tens of thousands of custom hooks

We continually lead the industry in creating efficient, custom wire form and hanging solutions that cater to diverse applications.

At EPSI, our custom process commences by gathering all relevant data from the client, including drawings, samples, and any other pertinent information.

Through a comprehensive consultation process, we discuss and determine the most suitable wire form or hanging method to utilize. Our ultimate goal is to produce a final product that aligns with the client's precise requirements and specifications.

Custom wire forms can be made as small as 0.060" in wire diameter and up to 3/4" in wire diameter. You choose the wire style and material that best fits your applications needs!

Go Custom with EPSI and SAVE!

ST

Silicone Tubing

Heat resistant up to 600°F (315°C)

Material: Silicone

- » When sizing parts as a sleeve, the ID of the ST Tubing should be approximately equal to the stud diameter
- » To ensure easy removal, cut the tube length at least 1/2" longer than masking length of the stud. This is especially important if the tube ID is smaller than the stud diameter by more than 2%
- » When sizing parts as a plug, the OD should be 3 - 7% larger than the hole diameter
- » Due to the low tear resistance of silicone, do not use pliers or other sharp tools for removal
- » Can be used in conjunction with a standard cap to create a long, non-hollow cap

FSTS

Flexible Star Tubing

Heat resistant up to 600°F (315°C)

Material: Silicone

- » Fits over threaded studs, dowels, pins and tube stock
- » Each size fits multiple diameters
- » Low friction for easy placement and removal
- » Flexible enough to conform to irregular geometries
- » Cuts easily to length
- » When sizing product as a sleeve, the Major ID of the FSTS tubing should be approximately equal to the stud or tube diameter you are sliding it over

CRDS

Solid Silicone Cord

Heat resistant up to 600°F (315°C)

Material: Silicone

- » Plug exposed channels or grooves on machined parts
- » Used to plug threaded and non-threaded holes
- » Cuts easily to length
- » To ensure tight seal, pick a product whose outer diameter (OD) dimension is at least 3-7% larger than the hole or groove that is being masked

Part number	Color	Diameter (in)	Diameter (in)	Diameter (mm)	Roll Length (ft)

CRDF

Silicone Foam Cord

Heat resistant up to 600°F (315°C)

Material: Silicone foam

- » Elongate the cord during application to make insertion easy. Cord will return back to original shape when released and create a liquid tight seal
- » To ensure a liquid tight seal, pick a product whose outer diameter (OD) dimension is 3 - 7% larger than the hole or groove that is being masked
- » Compresses to seal off slots and through holes
- » Conforms to irregular shaped openings
- » Cuts easily to length
- » Color coded for easy identification

Part number	Color	Diameter (in)	Diameter (in)	Diameter (mm)	Roll Length (ft)

SHFS

Silicone Foam Sheeting

Heat resistant up to 600°F (315°C)

Material: Silicone

- » Silicone foam is more conformable and lighter in weight than solid silicone rubber
- » Silicone foam's fabric-like top film is extremely durable and resists powder build-up
- » Saves labor time over traditional tape masking, and can be reused for additional cost savings
- » Foam sheeting is a closed-cell structure and will not absorb water
- » Can be custom cut to your specific design requirements
- » Reusable paint mask
- » Foam sheeting (SHFS) is conformable and lightweight

Silicone Foam

Part number	Standard L x W (in)	Standard Thickness (in)	Standard Thickness (in)	Metric Thickness (mm)	Standard L x W (mm)
SHFS 0032	36 X 36	0.125	1/8	3.2	914 X 914

Not all sizes are available in all warehouse locations - please check with your local sales rep for lead time and availability

SHRS

Solid Silicone Sheeting

Heat resistant up to 600°F (315°C)

Material: Silicone

- » Silicone rubber has a smooth surface where as silicone foam has a textured surface
- » Saves labor time over traditional tape masking, and can be reused for additional cost savings
- » Can be custom cut to your specific design requirements
- » Reusable paint mask
- » Solid rubber (SHRS) is ideal for gaskets in sealing application or can be used as a cushion to protect your products from costly scratches

PTS

Paint Touch-Up Stick

(Powder Coating Applications - Available in Smooth & Textured Finish)

- » Need a quick and easy touch-up solution for your powder coat? EPSI has you and your part covered
- » Ideal for repairing minor damage to touch points using the powder you already have on hand
- » Measure the perfect amount of powder with the built-in dosing chamber located inside the cap
- » One stick for each color in smooth or textured finish to match your application needs
- » Reusable – Up to 3 month shelf life once mixed

Part number	Description	BAG QTY
PTS-1	Paint touch stick, smooth, 8 ml	1
PTS-2	Paint touch stick, texture, 8 ml	1

CNC

Cross-N-Click Racking

- » Innovative crossbar system for quick and easy assembly
- » Ideal for small parts and small part production runs
- » Comes as a complete system with twin hooks (two hooks in one!) for hanging small parts
- » Customizable to accommodate various hook styles
- » Shipped as individual parts, saving time and space in transit when compared to preassembled welded frames

Part number	Crossbar Width (in)	Level Hooks (in)	Number of Levels	Quantity Twin Hooks	Box Qty
CNC-01X03	40	6 in & 10 in	4	120	3

HGT

Round XBar

- » Round XBar offers optimized grounding of components
- » Life of XBar can be taken even further when paired with specially designed SCH masking cap
- » Wide range of standard tip styles available
- » Custom sizes are available upon request

Round XBar

Part number	A (in)	B (in)	Hanging Points	Box Qty
HGT-1000X32	38.5	2.36	32	1

PLT

Profile XBar

- » Our Profile XBar is specially designed to hang a wide range of part profiles
- » Narrow upturning design of the mounting plates allows for sturdy yet flexible support for components

Profile XBar

Part number	A (in)	B (in)	C (in)	Hanging Points	Box Qty
PLT-1000X06	38.5	18.7	2.55	6	1

SB

SB Crossbar

- » Standard SB Crossbar offers flexible hanging points for varying hook diameters
- » This crossbar is compatible with all standard hooks sizes
- » Special design offers optimal contact with the formation of a faraday cage (shield)

Crossbar with Hanging Rod

Part number	A (in)	B (in)	C (in)	D (in)	Max Hook Dia	Hanging Points	Box Qty

Custom Racking

Why Choose EPSI?

EPSI is the undisputed leader in providing finishing and painting solutions. Our 75 years of experience have earned us an unbeatable reputation in the industry. We take pride in being the largest builder of custom racks, baskets, and fixtures.

Our products are designed and manufactured to meet your specific requirements, and we rebuild fixtures to like-new condition. We create custom metal and plastic fabrications that are unmatched in quality and durability.

Our team of industry experts can optimize your equipment's capabilities by designing tools that consider space utilization, loading/unloading efficiency, and ergonomics. We offer solutions for industry standards including OSHA, 5s, Lean Management, and ISO.

You can expect highly personalized service from our team of professionals who are committed to meeting your needs.

Expansion into Racking/Tooling

- » Acquired **An-Kor Rack** in Milwaukee, WI in 2019
- » Acquired **Associated Rack Corporation** (included 6 mfg. locations) in 2021
- » Acquired **Custom Rack** in Euless, TX in 2022
- » Acquired **Filter** in Germany in 2022

Custom Tooling and Fabrication

Anodizing Racks

- » Custom Tooling for Type I, Type II, and Type III Anodizing
- » Manufactured with Aluminum, Titanium, or a combination of both metals
- » Platisol Coated or Uncoated
- » Designed with Current Requirements, Part Hold and Fit, and Ergonomic Items Considered
- » Servicing Aerospace and other Industries

Conforming and Auxiliary Anodes/Cathodes

- » For All Plating and Anodizing Processes
- » Manufactured with Titanium, Lead, Stainless Steel, or Steel
- » Manufactured with Bar Stock, Round Stock, Perforated, and/or Expanded Metals
- » Coated with Iridium Oxide or Platinum (for Decorative Chrome Plating)
- » Designed with Current Requirements and Part Geometries Considered
- » Servicing Automotive, Aerospace, Military, and other Industries

E-Coating Racks

- » Manufactured with Stainless Steel and Steel
- » Uncoated
- » Designed with Part Density, Part Orientation, and Consistent Grounding Considered
- » Servicing Automotive, Heavy Equipment, and other Industries

Flight Bars

- » For All Plating and Anodizing Processes
- » Manufactured with Copper, Aluminum, Stainless Steel, or Titanium
- » Uncoated or Portions Platisol Coated
- » Designed with Current Requirements, Chemical Exposure, and Hoist Limitations Considered
- » Servicing All Industries

Custom Tooling and Fabrication continued

Material Handling Baskets, Carts, and Racks

- » For Storage, Internal Transportation, Domestic Transportation, and or International Transportation
- » Manufactured with Steel, Stainless Steel, or Aluminum
- » Plastisol Coated or Uncoated
- » Designed with Part Protection, Part Density, and Part Security Considered
- » Servicing All Manufacturing Industries

Plating Barrels

- » New Barrels and Repair of Existing Barrels
- » Manufactured with Poly Propylene
- » Designed with Part Size and Load Size Considered
- » Servicing Fasteners and other Industries

Metal Fabrication

- » Custom designs
- » Plastisol Coated or Uncoated
- » Capabilities Include:
 - » 3D Printing
 - » Welding (MIG, TIG, Resistance)
 - » Laser Cutting
 - » Water Jet Cutting
 - » Wire Forming
 - » Bending/Braking
 - » Milling
 - » Lathe Work

Plating Racks (Plastic and Metal Parts)

- » Custom Tooling for all Plating Processes
- » Manufactured with Copper, Stainless Steel, Steel, Titanium, Aluminum, Phosphor Bronze and/or Brass
- » Plastisol Coated or Uncoated
- » Designed with Current Requirements, Part Orientation, Part Density, Part Protection, Ergonomic Items, and Weight Considered
- » Servicing Automotive, Aerospace, Heavy Equipment, Agriculture, Plumbing, Hand Tools, Electronics, Medical, Door Hardware, and Home and Office Furniture, Industries, as well as Job Shops

Custom Tooling and Fabrication continued

Powder Coat Racks and Hooks

- » Custom Tooling for all Powder Coat Processes
- » Standard and Custom Hooks for Hanging Parts
- » Manufactured with Stainless Steel and Steel
- » Uncoated
- » Designed with Part Orientation, Part Density, Part Protection, Ergonomic Items, and Weight Considered
- » Servicing Automotive, HVAC, Hardware, and Appliance Industries, as well as Job Shops

Printed Circuit Board (PCB) Racks

- » Custom Tooling for Copper, Electroless Nickel, and Electroless Gold Plating
- » Manufactured with Copper, Stainless Steel, and Steel
- » Platisol Coated, Halar Coated, or Uncoated
- » Designed with Current Requirements, Board Size, Board Thickness, and Weight Considered.
- » Servicing the Electronics Industry

Processing Baskets

- » Custom Tooling for Plating, Electroless Plating, Powder Coating, Painting, and Cleaning Processes
- » Manufactured with Stainless Steel, Steel, or Titanium
- » Manufactured with Bar Stock, Round Stock, Perforated, and/or Expanded Metals
- » Designed with Part Orientation, Part Density, Part Security, and Weight Considered
- » Servicing the Automotive, Aerospace, Medical, Plumbing, Electronics, and Door Hardware Industries, as well as Job Shops

Wet Paint Racks and Hooks

- » Custom Tooling for all Paint Processes
- » Custom Tooling for Metal and Plastic Parts
- » Standard and Custom Hooks for Hanging Parts
- » Manufactured with Stainless Steel and Steel
- » Uncoated
- » Designed with Part Orientation, Part Density, Part Protection, Ergonomic Items, and Weight Considered
- » Servicing the Automotive, Aerospace, Heavy Equipment, Agriculture, and Appliance Industries, as well as Job Shops

Precision, Quality and Innovation...
Since 1880
